Memories last longer on Fujicolor Prints...

When you order your prints on new Fujicolour Crystal Archive paper, something amazing happens. For the first time you'll have pictures which last longer with minimal fading. So that 60 years* from now, they'll be as freshfaced as the day you were photographed.

...we promise!

In fact, so confident are we about the quality of our prints on fujicolour Crystal Archive paper, that we promise to re-print from the original negative any Crystal Archive photograph that shows signs of fading.* So, choose Fujicolour Photoprints, and you need never grow old again - on paper anyway!
